EXPERIENCE

Full-Stack Developer Intern | Clixoo Solutions Pvt Ltd

05/2025 - Present | Chennai

- Developed and maintained dynamic websites using **PHP** for backend logic, **MySQL** for database management, and **HTML/CSS** for front-end design. Implemented **JavaScript** for interactivity, ensuring responsive user experiences across devices and browsers.
- Utilized cPanel for website deployment, server management, and domain configuration, ensuring optimal site performance and **security**.
- Integrated payment gateways into client websites, handling secure transaction processing and improving e-commerce functionality.
- Worked with **WordPress** to build and customize themes, plugins, and features, delivering tailored solutions to meet client requirements.

MERN Technology Intern | EY GDS & Next Gen Edunet

02/2025 - 03/2025 | Remote

- Contributed to the development of a food delivery platform using the **MERN** stack, focusing on backend architecture and database design with MongoDB, Express.js, **React**, and Node.js.
- Designed and optimized MongoDB schemas for efficient management of user data, restaurant listings, and order information, ensuring scalability and performance for high traffic.

Web Development Intern | Main-Flow Services and Tech

02/2024 - 03/2024 | Remote

- Core Technologies: HTML5, CSS3 (**Flexbox & Grid**), JavaScript (ES6+), Git & **GitHub**, responsive design principles.
- Built a responsive, mobile-first portfolio with smooth navigation and a JS-validated contact form

PROJECTS

- **AI-PCKH**
 - Full-stack TypeScript MERN knowledge hub with Google Gemini summarization, semantic search/Q&A, JWT auth, role-based access, and PostgreSQL.
- **OpenMaps with GPS Live**
 - Responsive React app using OpenStreetMap with GPS, searchable places, smooth zoom, coordinate/location info, and map-view toggle.
- **Weather & Map Locator with APIs**
 - Weather & Boundary Map App is a dynamic web application that combines satellite mapping with real-time weather visualization.
- **YouTube-Focus**
 - Lightweight browser tool that filters and customizes the YouTube UI to create a distraction-free viewing experience
- **Food Delivery Web Application - Frontend (Zomato Clone)**
 - Food Delivery Application using Html and CSS. In this Zomato App clone I have cloned maximum pages Home page, User Profile page, Food Selection page etc.,
- **F1- Streetwear**
 - Framer e-commerce prototype for an F1-inspired streetwear brand focused on clean, conversion-driven UX.
